

RETAIL WALL DISPLAY WITH SECURITY OPTIONS

As the cannabis dispensary business evolves, retailers face challenges and opportunities of serving a broader range of customers across an ever-expanding line of products, all within varying floor space situations.

In addition to these more traditional retail challenges, dispensary regulations fixtures that display cannabis products must meet strict state guidelines including security of the product both during and after business hours. Showcases and wall display fixtures that will meet your floor plans, your products, and security requirements, while also supporting your targeted price points are available through Higher Environments.

HIGHER/ENVIRONMENTS™

a division of Stylmark, Inc.
