

StretchFrame™ Low Profile Non-lit Tension Fabric Display (TFD) Frames

Data Sheet

General Description: Stylmark's StretchFrame™ takes your graphics to the edge, eliminating the conventional framed-in look. Tension fabric graphics are retained using a silicone edge gasket (SEG) fitted into a channel in the aluminum frame.

Applications: Signage in retail, commercial or transportation environments. Way finders in entertainment, museums or restaurants. Interior décor in hospitality, medical and corporate environments.

Key Features:

- Low profile frame puts the focus on the graphic, not the frame
- Easy-to-assemble using tension lock connection feature
- Ideal for large format tension fabric displays
- Internal supports are provide as required to maintain rigidity for large format frames
- Ships as knock-down kit for easy shipment
- Coordinate finishes with Stylmark's wide variety of anodized finishes
- Single sided frame for wall mount displays or double sided frames for hanging and floor displays
